DANIEL MOHAMAD

Full-Stack Software Developer | AI Application Developer

Kuala Belait, Brunei Darussalam | +673 7148981
daniel.ridzwan.mohamad@gmail.com
github.com/DannyRidz | linkedin.com/in/danielmohamad
Portfolio: dannyridz.github.io/Project-Building-Your-Personal-Website

PROFILE

Brunei-based developer building full-stack web applications and AI-powered tools. Projects include a codebase explorer grounded in parsed dependencies, a published Android voice translator, and a coffee leaf screening application. Completed The Odin Project JavaScript curriculum. Previous engineering project delivery experience at Wood and NuQuest brings practical troubleshooting, documentation and coordination skills.

TECHNICAL SKILLS

Frontend: HTML, CSS, JavaScript, TypeScript, React, Next.js, Vite, Tailwind CSS

Backend and data: Node.js, Express, REST APIs, PostgreSQL, Prisma, Supabase Edge Functions, Supabase Auth, Clerk, JWT, row-level security

AI and mobile: OpenAI Realtime, WebRTC, Gemini, Managed Deep Agents, LangChain, LangSmith, Capacitor, RevenueCat

Testing and delivery: Git, GitHub, Vitest, Testing Library, Firebase Hosting, Cloud Run

SELECTED ENGINEERING PROJECTS

Cartograph | Repository exploration and code understanding

Next.js, TypeScript, ts-morph, React Flow, Supabase, OpenAI, Managed Deep Agents

- Built an interactive dependency explorer for public JavaScript and TypeScript repositories, resolving actual imports and reporting skipped files and unresolved connections.
- Reused graph traversal across the map and repository Q&A tools. Connected AI explanations to recorded facts, with organization access enforced through Supabase row-level security.

github.com/DannyRidz/Cartograph | Public source and screenshot walkthrough

RidzTalk | Two-way AI voice translator

React, TypeScript, OpenAI Realtime, WebRTC, Supabase, Capacitor

- Built and published an Android app for bilingual voice conversations; packaged the React app for Android and iOS with Capacitor. Integrated transcription, translation and spoken playback.
- Handled asynchronous speech turns and response identities. Used server-side functions for temporary audio-session credentials, with authentication, usage and subscription handling.

github.com/DannyRidz/RidzTalk-showcase | Google Play | Production source private

Crop Health Assistant | App developer, team J2D

Next.js, TypeScript, Gemini, Zod, pdf-lib, Firebase Hosting, Cloud Run

- Developed a photo-to-report application in a two-person team, with structured AI response validation, English and Tok Pisin support, and downloadable PDF reports.
- Kept visible observations distinct from tentative causes and sourced regional care suggestions. The app does not claim confirmed diagnoses or measured agricultural accuracy.

DANIEL MOHAMAD

Experience and education

PROFESSIONAL EXPERIENCE

Project Engineer | Wood (Amec Foster Wheeler (B) Sdn Bhd)

December 2022 - March 2025

- Coordinated onshore and offshore workstreams for BSP rejuvenation projects, working with technical teams, contractors and vendors to resolve delivery issues.
- Prepared and reviewed construction work packs against engineering, safety and regulatory requirements, maintaining clear documentation and audit readiness.
- Improved planning and resource allocation, reducing execution time by 15%.

Project Coordinator | Wood (Amec Foster Wheeler (B) Sdn Bhd)

January 2021 - December 2022

- Tracked milestones, risks and dependencies across turnaround scopes, contributing to a 98% on-time completion rate.
- Worked with contractors, vendors and internal stakeholders to investigate constraints, coordinate decisions and keep work moving.

Project Coordinator | NuQuest Sdn Bhd

May 2020 - December 2020

- Maintained progress reporting and project documentation, coordinating stakeholders around milestones, risks and next actions.

ADDITIONAL BACKEND WORK

Blog API: Built an Express REST API with Prisma, PostgreSQL and JWT authentication, connected to separate public reader and private admin applications. Source

Messaging App: Built a React, Express and PostgreSQL app with server-enforced conversation membership, message handling and loading, empty and error states. Source

EDUCATION AND LEARNING

Bachelor of Industrial Engineering & Management
International University of Applied Sciences (IU), Germany | Completed December 2025

BA/BSc (Hons) Audio Production | SAE Institute London, UK | 2016

BTEC Extended Diploma, Electrical/Electronic Engineering
City of Westminster College, UK | 2013

The Odin Project: Completed the JavaScript curriculum, with projects covering web interfaces, APIs, databases, authentication, testing and deployment.

To Whom It May Concern,

I am pleased to write this letter of recommendation for Mr Daniel Mohamad, who has been an integral part of our team at Wood Brunei. As a Project Engineer with over five years of experience in the oil and gas industry, Daniel has consistently demonstrated exceptional technical expertise, strong leadership skills, and an unwavering commitment to project success.

During his tenure at Wood Brunei, Daniel played a critical role in managing various engineering projects, coordinating multidisciplinary teams, and ensuring the seamless execution of complex offshore and onshore activities. His ability to oversee the preparation of construction work packs, liaise with engineering disciplines, manage onshore fabrications, and maintain compliance with industry standards has been instrumental in delivering projects on time and within budget. Additionally, he has proven adept at managing stakeholder relationships, vendor collaborations, and client communications, further solidifying his ability to deliver successful projects.

Beyond his technical acumen, Daniel has exhibited outstanding problem-solving capabilities, strategic thinking, and effective communication skills. He has been proactive in identifying project constraints and implementing solutions that optimise workflow efficiency. His leadership and collaborative approach have fostered a positive working environment, ensuring alignment between engineering, operations, and support services.

Daniel's dedication to excellence, coupled with his deep understanding of project execution in the oil and gas sector, makes him a valuable asset to any organisation. I am confident that he will continue to excel in his professional career and contribute meaningfully to any team he joins.

I strongly recommend Daniel for any position that seeks a highly competent, results-driven, and motivated professional. Should you require further information, please feel free to contact me at gary.tassell@woodplc.com.

Sincerely,

Gary Tassell
Country Manager
